PROJECTS

Full-Stack Trading Platform |

React, Javascript, Bootstrap, Node.js, Express.js, MongoDB, Chart.js

[Link](#)|[GitHub](#)

- Developed a Zerodha-inspired stock trading platform with a clean user interface for managing investments and exploring market data..
- Implemented user authentication, portfolio management, and stock tracking features to provide a seamless trading experience.
- Built using React, Node.js, Express.js, MongoDB, and Bootstrap, ensuring performance, scalability, and cross-device compatibility.

Chat Application |

React, TailwindCSS, Express, Node.js, JWT, MongoDB, Socket.io

[Link](#)|[GitHub](#)

- Developed a real-time chat application with secure user signup and login, enabling instant one-to-one and group messaging.
- Implemented live features such as online/offline user status, message delivery status, and timestamps using WebSockets (Socket.IO).
- Designed a responsive and user-friendly interface to ensure smooth real-time communication across devices.

TECHNICAL-SKILLS

- **Programming-Languages:** JavaScript,Typescript
- **Web-Development:** React.js, Next.js, Node.js, TailwindCSS, Bootstrap, Express.js, RESTful APIs, Socket.IO
- **Tools&Frameworks:** Git, GitHub, Mongoose
- **Databases :** MongoDB, MySQL
